WORK EXPERIENCE

SAP

Student Intern

Aug 2025 - Present

- Built an AI-driven conversational agent to fetch SAP MM supplier, PO, and GR data using natural language queries, cutting manual lookup time by ~70%.
- Automated complex procurement queries (supplier-wise POs, date-based orders, PO-to-supplier mapping), reducing human dependency in SAP navigation.
- Developed a POC showcasing the application of SAP Cash Application ML for automated reconciliation.
- Collaborated with a senior consultant to gather requirements and translate them into a working prototype.
- Demonstrated the potential of ML-driven automation to reduce manual intervention and improve accuracy in invoice-to-payment matching.

Money Mantra AI (Free Lancing)

Software Developer Intern

Nov 2024 - Dec 2024

- Integrated Alpha Vantage API into Django backend and designed optimized schema for financial data.
- collaborated with a 5-member cross-functional team.

EDUCATION

Jaypee Institute of Information Technology (JIIT), Noida

Bachelor of Technology (Computer Science and Engineering) - 8.4

Aug 2022 - Jul 2026

PROJECTS

Prepify – Speak. Practice. Get Hired [🔗](#)

- Built a 100% automated voice-to-voice interview simulator using Vapi & Firebase.
- Over 100+ calls made by peers and students for practicing English communication and interview skills.
- Reduced interview prep time by 40% compared to traditional mock setups.
- [Live Demo](#)

Evisto – Centralized Event Management Platform [🔗](#)

- College students received fragmented event updates via WhatsApp with no central management system.
- Built full-stack web app with dynamic event search, Stripe-based ticketing, and secure Clerk OAuth-based login.
- Reduced event discovery friction by 80%.
- [Live Demo](#)

Parallel Merge Sort Optimization [🔗](#)

- Standard merge sort was too slow for handling large datasets (10^7+ elements) in performance-critical environments.
- Implemented a multithreaded merge sort using C++17, parallelizing recursive calls to utilize multi-core CPUs.
- Achieved a 20x reduction in execution time while maintaining optimal space complexity.

SKILLS

- **Languages:** C++, Python, JavaScript, TypeScript
- **Web Technologies:** React.js, Next.js, Node.js, Express.js, Tailwind CSS, ShadcnUI, jQuery (familiar), Django
- **Databases:** MongoDB, MySQL, Firebase
- **Tools & Platforms:** Git, GitHub, Docker (basic), GitHub Actions, Postman, VS Code, Vercel
- **Core CS:** Data Structures & Algorithms, OS, Networking, Multithreading

AWARD & ACHIEVEMENTS

- Achieved a maximum contest rating of 1686, placing among the top competitive coders globally.
- Secured a global rank of 25 in Starter 154 Div 3 (Rated) among thousands of participants.
- Solved 700+ coding problems across platforms like LeetCode, CodeChef, and GeeksforGeeks. ([All Platform Links](#))
